# Your studies at the University Targu Mures Medical Campus Hamburg (UMCH)

Every year, UMCH students have the opportunity to study medicine without numerus clausus (NC) restrictions and without waiting time – entirely in Germany. The program at the UMCH campus in Hamburg is conducted in English and lasts a total of 6 years. The clinical practical training can take place in various teaching hospitals in Germany in the German language.

## Stdy program

EU-wide recognition

# MSA – Medical Studies Abroad

MSA is your strategic partner when it comes to starting your dream studies in the fields of human medicine, dentistry, veterinary medicine, or pharmacy without waiting time and without restricted admission (NC)!

## Know-how

---

Due to our many years of experience, we have the knowledge that leads you to your study placement. We analyze your applicant profile and find the suitable university for you. We support you with advice and action in all important decisions and help you realize your aspirations.

## Co-operations

---

We co-operate with over 30 renowned universities. Enjoy the advantage of small, exclusive exams, tests and interviews here in Germany. Depending on the university, we can also organise individual appointments for you.

## Application organisation

---

Notarised certifications, nostrification, Superlegalisation or apostille required? We support you with guidelines, a translation service and much more so that you can put together your application documents in no time at all.

## Accompaniment

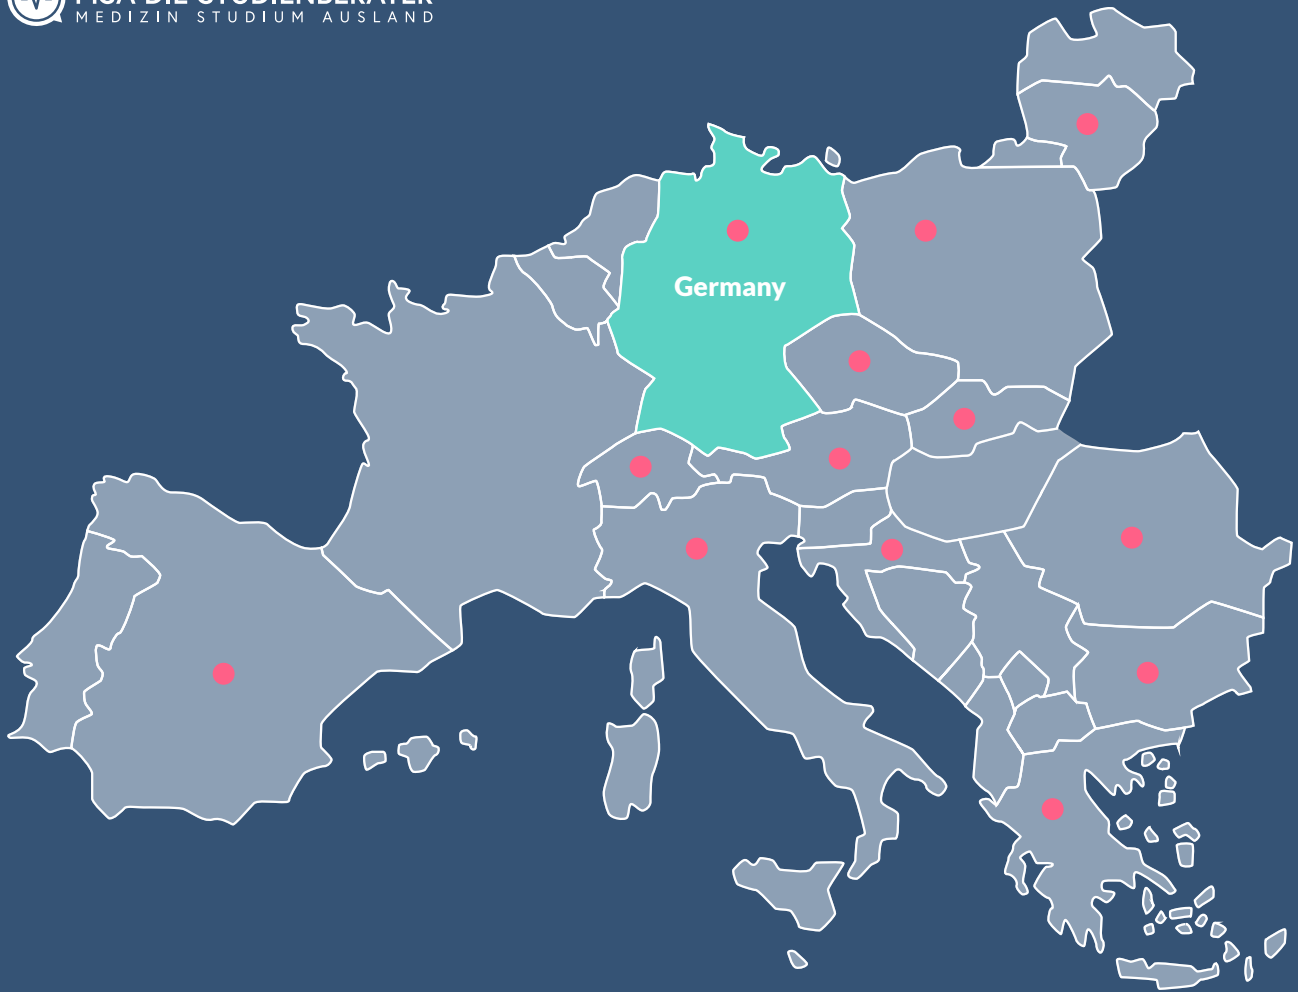

---

We will support you through every step of your application right up to the start of your studies and beyond - for example with WhatsApp groups, online tutorials and meetings on finding accommodation and support with enrolment at the university. Benefit from our extensive wealth of experience here too. Choose a first-class degree programme and pave the way for an international career in the medical field with MSA!

## Exam preparation

---

Exam nerves? That's not necessary with us! Our guides, interview briefings and learning materials give you the chance to prepare optimally for the exams, tests and selection interviews. The exams are organised by MSA in Hanover, at one of our other nationwide exam venues or, depending on the university and situation, online. This allows you to concentrate on your preparation and not waste valuable time organising a trip abroad.

## 01

MSA is successful for you: in some cases 100% success rate in recent years at various universities, e.g. in Budapest, Riga, Valencia, Brno and Nicosia.

## 02

Application without university entrance NC: entrance tests and preparation courses independent of the Abitur.

## 03

Study medicine in Germany now: Study medicine on the UMCH campus in Hamburg or in Frankfurt on the Galileo Campus of the EUC.

## 04

Efficiently from home: Advice on applying, starting your studies and returning to Germany, also possible online!

## 05

Simple: comprehensive application organisation with all the necessary documents.

## 06

Early Admission: Admission to many universities is possible one year before you receive your school-leaving certificate (or equivalent).

# Reasons to study at University Targu Mures Medical Campus Hamburg (UMCH)

## **State-of-the-art campus in Hamburg - proven concept:**

At UMCH - the international branch of the George Emil Palade University for Medicine, Pharmacy, Natural Sciences and Technology Neumarkt a. M. - you will study at a brand new medical campus based on a proven concept. Students benefit from the extensive experience of the academic staff and enjoy the advantages of a very modern, private campus, while at the same time being enrolled at a state university.

## **70 years of medical experience:**

The main campus is located in the city of Neumarkt a. M. and has more than 70 years of experience in the medical education of students. With a total of four faculties offering medically oriented degree programmes, it is characterised by a clear focus on medicine. The university currently has over 11,000 students.

## **Digital Campus:**

UMCH offers more than 6,000 square metres of teaching and learning space with excellently equipped laboratories and technology for the live transmission of lectures. At the campus in Hamburg, you will be trained using a 3D anatomy and dissection table, among other things. The use of this innovative technology helps medical students to explore the anatomy of the body in a vivid way. Using three-dimensional representations, anatomical structures can be interactively conveyed and organs, blood vessels and nerve fibres can be viewed from every angle.

## **Varied university life:**

UMCH also has a lot to offer outside of your studies. Whether semester parties, Christmas parties or blood donation campaigns - various events take place regularly. The UCMH student clubs also give you the opportunity to make friends and realise exciting visions and projects. This is where like-minded people who share hobbies and passions come together. Whether it's sport, culture, music or charity - the student clubs are all about discovering new things together and doing good!

## **Central university town:**

With more than 25 higher education institutions, Hamburg is one of the most important university centres in Germany. As a result, the city has a diverse student scene and a vibrant nightlife. Science City Hamburg Bahrenfeld will also be built around the UMCH campus over the next few years. So you will be studying in a great neighbourhood. The Elbe metropolis is also known as a media and start-up centre, has a lively cultural scene and is one of the cities with the highest quality of life in the world.

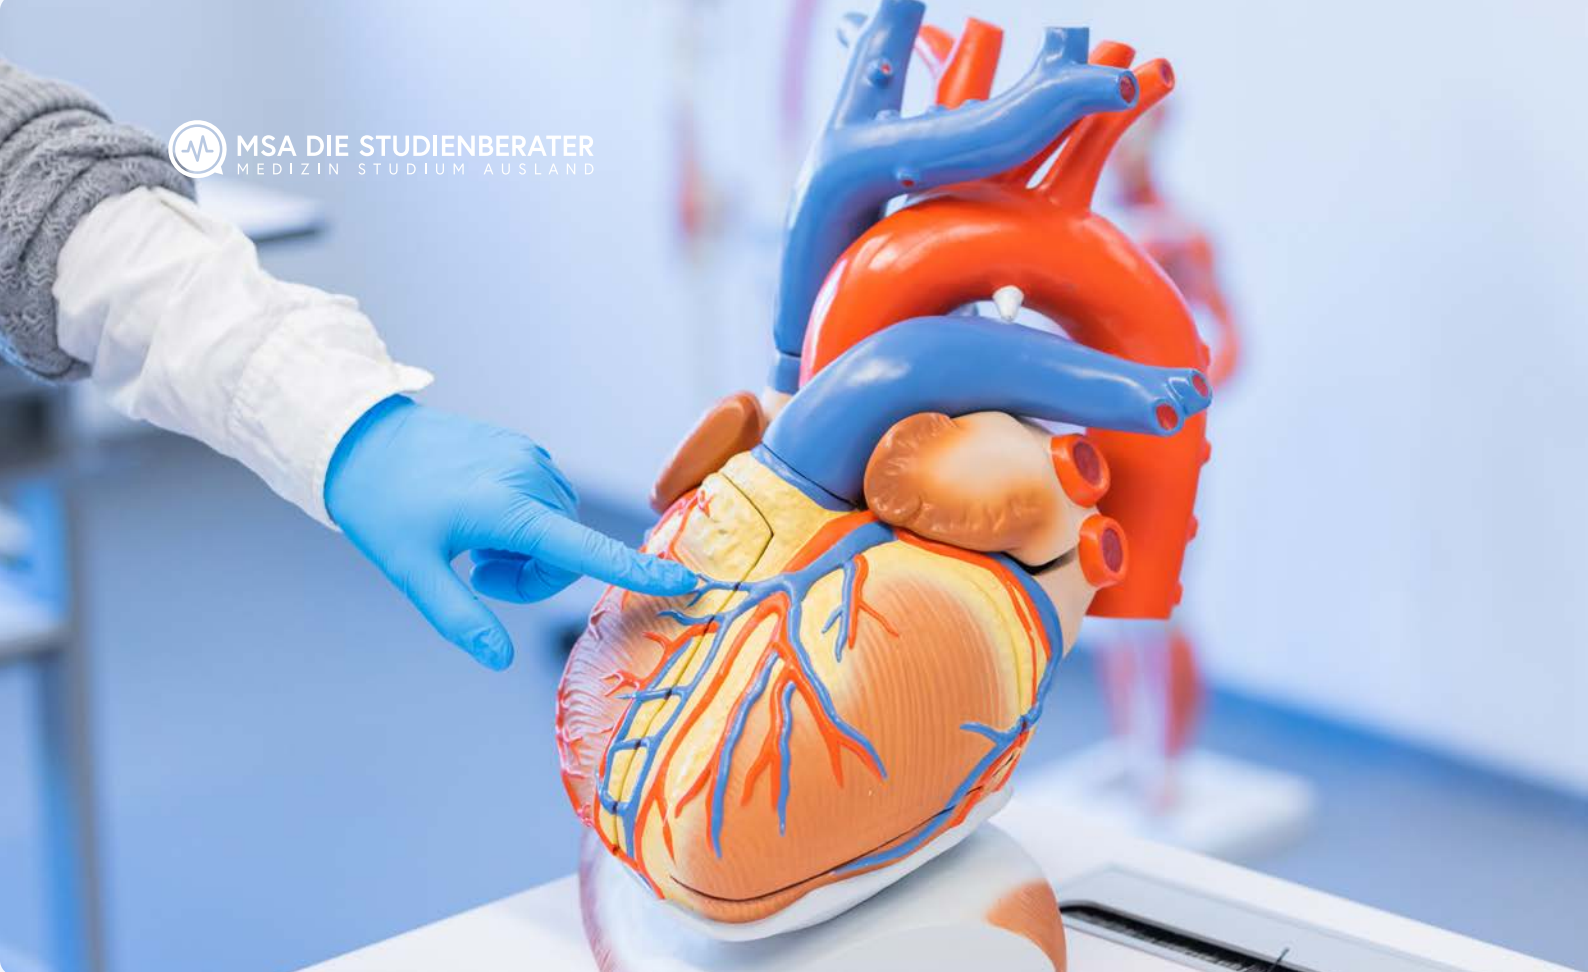

## **Personalised support:**

To support their studies, UMCH offers a counselling programme that students can take advantage of for psychological support and career planning. As a first-year student, you can also take part in the Buddy Programme. Here, experienced students are on hand to offer you advice and support at the start of your degree programme and provide you with insider information.

## **Personal development:**

In the ReachHigher lecture series, students are introduced to topics from the areas of personal and professional development beyond the curriculum. To this end, experts are invited to speak on topics relating to society as a whole, with a focus on medicine, but also on topics such as leadership and motivation.

# The study of medicine

## Medicine at UMCH

At UMCH you will study at one of the most modern university locations in Europe. UMCH offers more than 6,000 square metres of teaching and learning space with excellently equipped laboratories and technology for the live transmission of lectures. At the campus in Hamburg, you will be trained using a 3D anatomy and dissection table, among other things. There is a very good mentoring relationship between lecturers and students in all courses - both in the lectures and in the practical courses. There is close contact, which means that students receive targeted and individualised support.

**Form of study:**

6 years

**Studienform:**

Vollzeitstudium

**Recognition:**

EU-wide recognition

**Admission procedure:**

English: MSA application kit + entrance exam + entrance interview

## Without NC and waiting time - studying medicine in English in Germany:

Your Abitur grade does not play a role in the selection process. Admission is based on a written test (short evaluation) and an interview - regardless of the German NC limits and hochschulstart.de.

## Study years 1 and 2 in Hamburg:

All lectures and seminars on the Hamburg campus are held in English. The pre-clinical part of the programme is taught entirely in English during the first two years. In this way, you set the course for a successful international career at an early stage and can work in many countries after graduation.

## Study years 3 to 6 in Hamburg and at German teaching hospitals:

The clinical part of the programme (years 3 to 6) is carried out alternately on the campus in Hamburg and in renowned German UMCH teaching hospitals. The preparatory theoretical teaching on the campus in Hamburg, which prepares students for the practical phases in the hospitals, is held in English. German is the language of instruction during the clinical-practical training.

## Bilingual education - unique profile:

After graduation, graduates have a unique profile. They are trained internationally and in English, but at the same time bring with them a wealth of experience in medical practice in German teaching hospitals. This constellation is unique in Germany.

## No Physikum and no state examination:

There is no Physikum at UMCH - unlike the rule at German state universities. Instead, you complete your modules year by year. There is no in-built examination filter, which means that a high proportion of students fail. In addition, the degree programme does not end with the state examination.

## Tuition fees and charges

Study programme	Human medicine
University processing fee for the admission procedure*	595 €
Tuition fees*	1st and 2nd year of study in Hamburg: €17,400 (per semester) 3rd to 6th year of study in Hamburg and teaching hospitals in Germany: €17,400 (per semester)
Other university fees after admission	4.500 €
Registration fee**	-
Service fee**(only due after successful confirmation of study place)	The service fee amounts to 15.000 €.

\*Explanation see p. 13

# WITH MSA IN 5 STEPS TO A STUDY PLACE

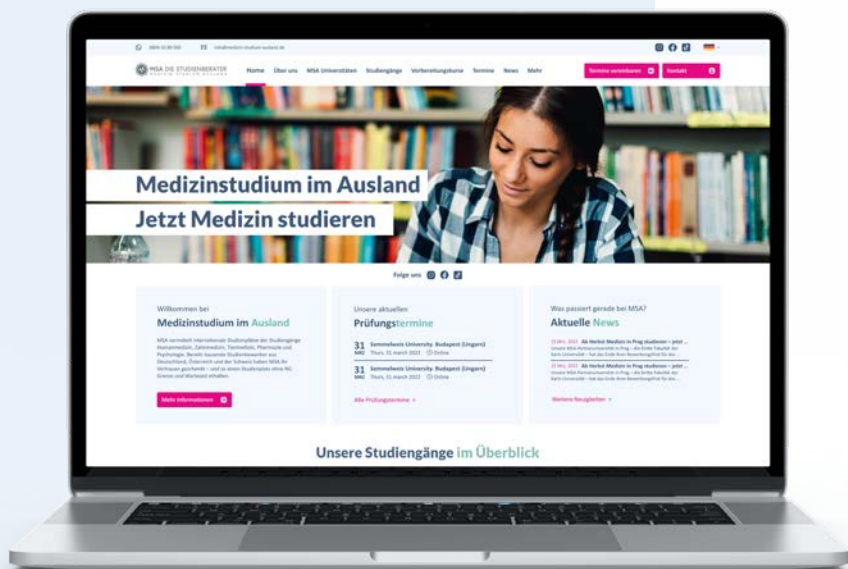

## Find the right university with us.

Based on your preferences and your applicant profile, we will provide you with comprehensive advice on your various options abroad and work with you to find the right choice of universities. Feel free to contact us at any time and ask us your questions! We are sure to find the right university(ies) for you.

1

2

## Start your study application and register for the MSA application programme.

Would you like to apply for a study place at the UMCH campus or at several of our partner universities? Complete and sign the application form and send it to us. As soon as we have received the application form and the first part of the service fee, you will be included in the applicant programme.

You will find the application form either as an attached file in an email from your MSA study advisor or as a download at [www.medizin-studium-ausland.de/HH](http://www.medizin-studium-ausland.de/HH).

Send us the completed application form to [bewerbung@medizin-studium-ausland.de](mailto:bewerbung@medizin-studium-ausland.de) or via WhatsApp to +49 (0) 176 15722053.

## Application organisation

As part of the admissions process, the university will first evaluate the application documents you submit to us. Our student counselling team will compile these together with you and ensure that the required documents meet the exact requirements of the university. In order to study at UMCH, you must also successfully complete an entrance test and an interview in English. In the interview, your English language skills are tested and questions are asked about your motivation and future plans, your personal background and your previous experience in the medical field. The entrance test, also known as a short evaluation, contains multiple-choice questions on biology, chemistry and general knowledge.

The admission procedure is organised and carried out by the MSA team on campus in Hamburg and, depending on the situation, also online. To help you prepare for the exam situation in the best possible way, we will provide you with learning and practice material that is specially tailored to the admission procedure at UMCH. We will also practise the interview with you so that you feel confident in the crucial exam situation. We work with you on each application individually and keep you up to date with the processing status. There are generally only a limited number of places available for the entrance exams. We therefore recommend that you register as early as possible.

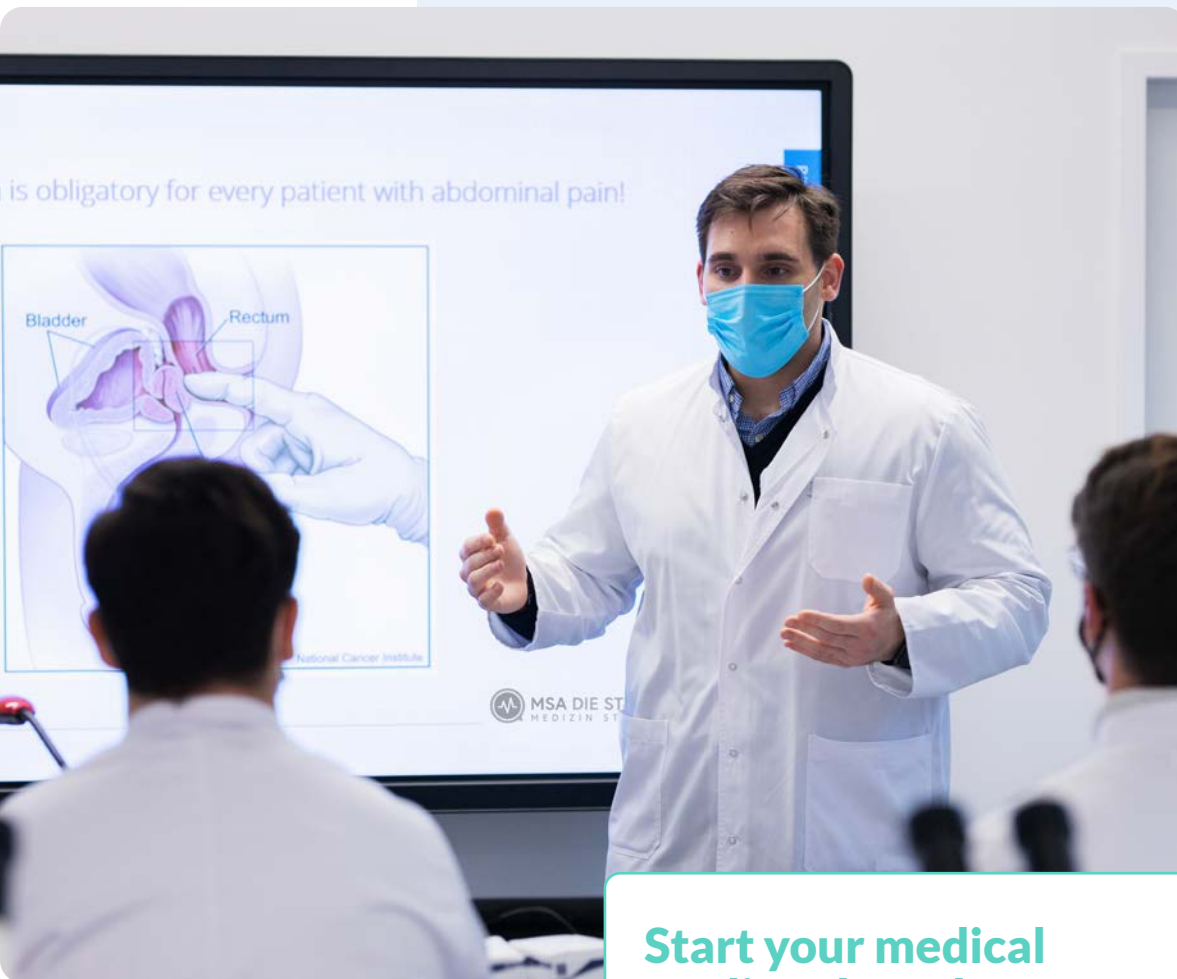

3

4

## Choose the university of your choice and prepare for your degree programme.

If you have received more than one acceptance letter, we will help you decide on a university. The experienced MSA team can provide you with plenty of background knowledge to advise you on this important decision. Perhaps you would like to optimally prepare for your medical studies with the MSA Academy's paid medical preparation courses? We can also support and advise you here.

5

## Start your medical studies abroad.

We continue to support you after admission - at the start of your studies and beyond, for example with online tutorials and meetings. We will help you find accommodation in your future city of study, enrol at the university and during the orientation phase on site. You can contact us at any time with any questions you may have. So nothing stands in the way of a successful degree programme!

# Recognition

The six-year medical degree programme at UMCH leads to a university degree in human medicine, which corresponds to the professional qualification listed in Annex V of the EU Professional Qualifications Directive and forms the basis for obtaining a licence to practise medicine in the EU and many other countries. In addition, the UMFST Neumarkt a. M. is listed together with UMCH in Hamburg in the World Directory of Medical Schools (WDOMS) (FAIMER school ID: F0000226). This currently enables students to take the American state examination (USMLE - United States Medical Licensing Examination).

## Attention:

\*The contract can be cancelled at any time. If the contract is cancelled or otherwise terminated before the University Medical Center Neumarkt a. M. Campus Hamburg (UMCH) is cancelled or otherwise terminated, the fee shall be reduced to EUR 3,900 after the order has been placed and the documents have been requested, to EUR 4,900 after the applicant has sent the first documents, and to EUR 7,900 after the first documents have been submitted to UMCH. If all application documents have been submitted to UMCH or if the applicant has passed an admission test or interview, the fee owed is 75% of the service fee; if the applicant has received a letter of admission, the fee owed is 100% of the service fee (full service fee).

# OUR MEDICAL PREPARATION COURSES

With the MSA Academy's preparatory courses, you will be excellently prepared for your future medical studies. You will build on your previous school knowledge and acquire medical expertise at an early stage. The scientific expertise you gain will give you a great head start for your future studies, and all our courses are held in English - the global language of science. As a result, our participants learn the specialist terminology required for medical studies at an early stage, familiarising themselves with theory and practice as well as other study-related topics - and getting to know their future fellow students.

## PRE-MEDICAL-COURSE

You can find current dates under:

[www.medizin-studium-ausland.de/pre-medical-course/](http://www.medizin-studium-ausland.de/pre-medical-course/)

Our 3-week pre-medical course covers the subjects of biology, chemistry and physics. Here you will mainly learn the basics in these areas and build on what you already know from school. During the crash course, you will acquire an enormous amount of scientific knowledge in just a few days, which is a prerequisite for your upcoming medical studies.

**DURATION:**

3 weeks

**LANGUAGE:**

Lessons in English

**TIME SPACE:**

June/July and September

**COSTS:**

2.900 €\*  
\*Explanation see p. 13

# LATERAL ENTRY TO IMEDICAL STUDIES IN EUROPE OR GERMANY

Are you already studying medicine abroad but would like to transfer to another university? Or are you determined to continue your studies in Germany? A lateral entry into a higher semester at another university or a change of study location is not uncommon. However, transferring to another medical university can be a difficult and lengthy process, as there are different study programmes, especially for medicine. A lot needs to be taken into consideration when making a lateral move: Will the coursework completed be recognised? What are the admission requirements at the new university? When is the application deadline?

MSA - your student counselling team for studying medicine abroad - helps you to change universities quickly and easily without having to find an exchange partner first. We have more than 20 years of experience in finding study places for human medicine, dentistry, veterinary medicine, pharmacy and psychology. We co-operate with more than 30 renowned universities throughout Europe and also in Germany. At all of our partner universities, you can complete your studies with a degree that is recognised throughout Europe and is eligible for licensing.

## Recognition notices for medical studies in Germany

An international change of university requires planning and organisation. Achievements abroad must be recognised at the destination university. Some universities also have admission requirements for higher semesters. You should not burden yourself with all these necessary but time-consuming formalities. MSA will check your previous academic achievements for you and make sure that your ECTS credits are recognised in the best possible way and that your study time is not unnecessarily extended by the change. We will guide you safely through the entire admissions process and take care of all the necessary documents and applications to secure your desired study place and make the change of university as smooth as possible.

## 3 simple steps to a medical lateral entry programme at another university in Europe or Germany

### #1 Review of academic achievements & MSA credit analysis

Based on your transcript of records, we determine which of the achievements you have already completed in your previous medical studies can be recognised at our partner universities in the European Union - for example at UMCH in Germany - and we find out which academic year you will enter.

### #2 Application coaching & exam organisation

MSA works with you to develop the ideal application and ensures that the required documents meet the exact requirements of the university. With our training courses and comprehensive learning materials, we prepare you specifically for the relevant admission procedure. We also ensure that you can complete any examinations or interviews online. This means you don't have to travel within Europe or to Germany.

### #3 You have made it!

You will soon be able to continue your medical studies at one of our partner universities in the EU or in Hamburg at UMCH and study at a top university.

# SUPPLEMENTARY LEGAL INFORMATION

The General Terms and Conditions of CEGOM GmbH

apply: [www.medizin-studium-ausland.de/agboder](http://www.medizin-studium-ausland.de/agboder) if you choose Hamburg as your preferred place of study, the General Terms and Conditions of DAMSAS GmbH apply.

We would like to draw your attention to the following points in particular:

- MSA provides optimal preparation for the application, but cannot guarantee the receipt of a study place, as the decision on the acceptance of a study place is made solely by the respective university
- UMCH is responsible for the content of the programme as well as the programme structure, accreditation and recognition
- We at MSA always endeavour to ensure that students can start their studies smoothly. Nevertheless, external circumstances may cause examination dates and locations to be postponed or changed. In such a case, we will inform you immediately of any changes to examination dates and locations.
- MSA cannot accept any liability for the degree awarded by the respective university being recognised in your home country without further steps - such as additional examinations, internships, etc. - being taken. You are responsible for obtaining the relevant information and taking the necessary steps yourself
- MSA can also accept no liability for political events, for example if, contrary to expectations, the country in which a university is based should leave the EU or no longer follow the Bologna Process for any other reason.
